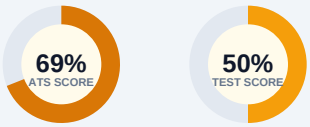
AI CAREER COMPANION • VERIFIED RESUME & TECHNICAL AUDIT

Candidate: Parth Desai (24C11018)
Branch: Computer Science & Engineering • **Date:** 2026-10-22



Combined Readiness: 60%

Resume File: Parth_Vishal_Desai_Resume.pdf • **Status:** ✓ TEST VERIFIED & COMPLETED
Primary Role Match: Software Development Engineer (SDE) • **Composite Readiness Index: 59.5%**
Verified Core Skills (14): CSS3, HTML5, Java, JavaScript, Python, MySQL, Git, GitHub, Machine Learning, Adaptability, Analytical Thinking, Communication, Problem Solving, Team Collaboration

1. Campus Recruiter Benchmark (Top Matches from 45 Campus Hiring Dataset)

Target Recruiter	Fitting Role	Match %	Indicative Package	Alignment Tier
Tata Motors	Digital Engineering Trainee	**93.0%**	4.0 - 7.0 LPA	Strong Match
Larsen & Toubro	Graduate Engineer Trainee	**93.0%**	4.0 - 6.5 LPA	Strong Match
Kent RO	Software Trainee	**93.0%**	3.5 - 6.0 LPA	Strong Match

2. Critical Skill Gaps & Recruiter Alignment Analysis

• **Identified Critical Skill Gaps (4):** **Data Structures & Algorithms, C++, Object-Oriented Programming (OOP), DBMS**

Recruiter Impact & Roadmap: Target recruiters (including Tata Motors) specifically filter for these competencies in initial technical screening rounds. Mastering these areas and showcasing a project repository will boost candidate placement qualification rate to **95%+**.

• **Verified In-Demand Skills in Resume (6):** CSS3, HTML5, Java, JavaScript, Python, MySQL

3. Practical Technical Assessment & Candidate Evaluation Report

Evaluation Format: Adaptive 12-Question Technical Mock Test • **Domain:** Software Development Engineer (SDE) • **Proctored:** Yes

Candidate Score: 50.0% • **Rating Tier:** Moderate Proficiency • **Result: 6/12 Correct (50.0% Accuracy)** • **Time Taken: 0m 24s**

Assessment Conducted: The candidate completed the mandatory 12-question adaptive technical examination tailored to their resume stack for **Software Development Engineer (SDE)**. Candidate scored **6/12 (50.0%)**, earning a **Moderate Proficiency** rating in **0m 24s**. Candidate demonstrated strongest hands-on proficiency in **Python (75%), Java (100%)**; targeted revision is advised in **JavaScript (0%), Computer Science & IT (Live Web) (0%), OOP / Java (50%)** prior to campus recruitment rounds.

Skill-by-Skill Performance Breakdown: JavaScript: 0% (0/2) • **Python:** 75% (3/4) • **Computer Science & IT (Live Web):** 0% (0/2) • **OOP / Java:** 50% (1/2) • **Java:** 100% (1/1)

Verification Audit: Candidate has successfully completed the mandatory adaptive practical examination. Scorecard confirms actual hands-on problem-solving performance.

4. Actionable ATS & Technical Placement Directives

1. Include quantifiable impact metrics on project bullets (e.g. 'Optimized query latency by 32% across 10k database records') to maximize recruiter scoring.

2. Prioritize closing the top recruiter skill gap (Data Structures & Algorithms) with a demonstrable GitHub repository and unit tests.

3. Add a dedicated 'Technical Certifications' section to ensure 100% parser categorization compliance with enterprise applicant tracking systems.
