

# AI Career Companion

By Riya Modi & Diksha Durgapal

## 1. Project Overview

**AI Career Companion** is an AI-powered platform designed to provide **career guidance and placement preparation** to students. It combines resume analysis, career recommendations, job matching, placement practice, and alumni experiences in one platform.

## 2. Need in Campus

- Helps students identify **suitable career and job roles** based on their skills.
- Provides **resume-based interview preparation**.
- Offers a centralized platform for **MCQs, theoretical questions, and placement practice**.
- Helps students understand how well their resume matches a **company's job description**.
- Provides access to **real placement and interview experiences shared by alumni**.
- Helps faculty identify students' **skill gaps and preparation needs**.

## 3. Major Modules

- **Resume Analysis:** Analyzes resumes, identifies skills, suggests suitable career areas, and generates possible interview questions.
- **Placement Preparation:** Provides subject-wise MCQs and theoretical questions with performance analysis.
- **Resume-Job Matching:** Compares a resume with a job description, provides a match percentage, and identifies missing skills.
- **Alumni Experience:** Allows alumni to share company, interview, and preparation experiences for current students.

## 4. Expected Outcomes

- Improved **career awareness and decision-making**.
- Better **resume and interview preparation**.
- Identification of **individual skill gaps**.
- Improved technical and aptitude preparation.
- Better understanding of **company-specific recruitment processes**.
- Increased student **confidence and placement readiness**.

## 5. Benefits for Students & Faculty

**For Students:** Personalized career guidance, interview questions, placement practice, skill-gap identification, job matching, and access to alumni experiences.

**For Faculty:** Better understanding of students' preparation levels, identification of common weak areas, support for placement training, and a centralized repository of placement resources and alumni experiences.

## 6. Overall Objective

To provide a centralized AI-based platform that helps students choose suitable career paths, prepare effectively for placements, evaluate job opportunities, identify skill gaps, and learn from the real experiences of alumni.
